User Journey:

1 Phases <small>High-level stages your user needs to accomplish their goal to begin</small>	Installation	Details	Image Processing	Gather Info
2 Steps <small>Describe actions your user has to perform</small>	Download and install application	Adding personal information	Scanning foods, fruits & veggies	Getting information by the recognized image
3 Feelings <small>What your user might be thinking and feeling at the moment</small>	Customer use to download & access this application Anyone can easily logged in to the application once it is downloaded	Why is this application asking for our nutritional info? Application that expose the nutrition quackery, health claims	This it help us take better care of the nutrients in our body? Can examine the nutrition in any workspace	This application very useful for maintain & control body nutrition Nutrition & aging , early childhood nutrition
4 Pain points <small>Problems your user runs into</small>	Could't know the apt application to install & use	Hesitate to give details about the patient's physical condition	If the image is not clever then the application can't scan the food	Doesn't getting the appropriate detail of the image
5 Opportunities <small>Potential improvements or enhancements to the experience</small>	Don't need to get any nutrition advise from any other person	The application provide what food they can intake	The user can utilise the application instantly from scanning & evaluate the nutritional values	The user can recognise the information from the scanned images
